E-WASTE SHREDDER

The SHE-400 E-Waste Primary Shredder is an industrial shredding machine engineered for efficient processing of electronic waste such as PCB boards, mobile phones, laptops, household appliances, and mixed electrical scrap. Built with a high-torque, low-speed shredding mechanism, it ensures safe size reduction while protecting valuable recoverable materials for downstream recycling processes.

Key Features

Core capabilities that make our E-waste primary shredders reliable, efficient, and safe for intensive industrial use.

- Twin-shaft high-torque shredding technology
- Low-speed operation for safe e-waste processing
- Hardened alloy steel cutting blades
- Automatic overload reverse protection
- PLC-based automation and monitoring
- Low noise and vibration design

Available Models

The E-Waste Primary Shredder is available in a single robust model – SHE-400. Designed specifically for efficient e-waste processing, the SHE-400 is ideal for shredding electronic waste such as circuit boards, computer components, cables, and other electrical scrap materials.

Electrical System

Total Power	60 HP
No. of Motors	2
Voltage	As per Client Requirement
Drive	Electric
Control Panel	MCC / PLC Controlled
Motor Make	Siemens / Crompton

Cutting Section

Cutting Chamber	800 × 700 mm
Rotor Diameter	320 mm
Blade Thickness	40 mm
Processing Capacity	4000 – 6000 kg/hr

Electrical Specifications

Length	3500 mm
Width	1500 mm
Height	2400 mm
Weight	Approx. 7000 kg

Applications of E-Waste Shredders

The SHE-400 E-Waste Primary Shredder is designed for size reduction of a wide range of electronic and electrical waste materials, making it suitable for recycling facilities and industrial waste management operations.

E-Waste Recycling Plants

IT Asset Disposal Centers

Industrial E-Waste Management

Electronics Dismantling Units

Municipal Recycling Facilities

Metal Recovery Industries

Technical Features

Our SHE-400 E-Waste Primary Shredder features a twin-shaft high-torque shredding system for uniform size reduction of electronic scrap. The heavy-duty steel housing and reinforced cutting chamber ensure stability under continuous operation. Hardened alloy steel blades provide high wear resistance and long service life. The machine is ideal for processing PCB boards, electronic assemblies, cables, and mixed e-waste in primary shredding lines.

Why Choose Vikah Ecotech Tyre Balers?

Vikah Ecotech stands out as a reliable tyre baler machine manufacturer in India due to our commitment to quality engineering and industrial performance. Our machines are designed for continuous operation, low maintenance, and maximum bale density.

- Heavy-duty hydraulic cylinders for powerful compaction
- Energy-efficient and low power consumption design
- Available in 150 Ton, 200 Ton & 250 Ton models
- Customizable bale dimensions
- Strong nationwide installation and after-sales support
